9.Print all the factors of a given number

ALGORITHM
1.Start
2..Input num,i=1
3.if num%==0 goto step 4 else goto step 5
4.Print i and goto step 5
5.i++ and goto step 6
6.if i==num Stop else goto step 3

```
         Start

         input num,i=1;

         if              yes        Print i
         num%i==0

              no

                              i++

         no        if
                   i==num

                        yes
         Stop
```
